

A close-up photograph of a white goat's head, showing its ear and nose. The goat is looking down and to the right. The background is a blurred, light-colored surface.

Caprina

Solutions
for your success

PURINA[®]

Caprina, Purina's line of products for your milking herd offers the nutrition needed to meet and to exceed the nutritional requirements of your dairy goats at all stages of production. Made with quality ingredients, Caprina products are built to emphasize pellet quality and palatability to offer the best for your herd.

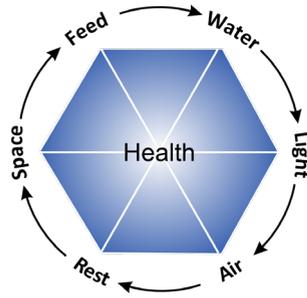

By selecting Purina as your business partner:

- You benefit from vast animal nutrition knowledge
- You gain from our deep understanding of ruminant metabolism and feed technology
- You partner with a global leader in animal nutrition and animal nutrition research
- You gain from our extensive knowledge of raw materials, nutrients and nutrient metabolism
- You benefit from expert technical services

PURINA®

THE RIGHT TOOLS FOR SUCCESS

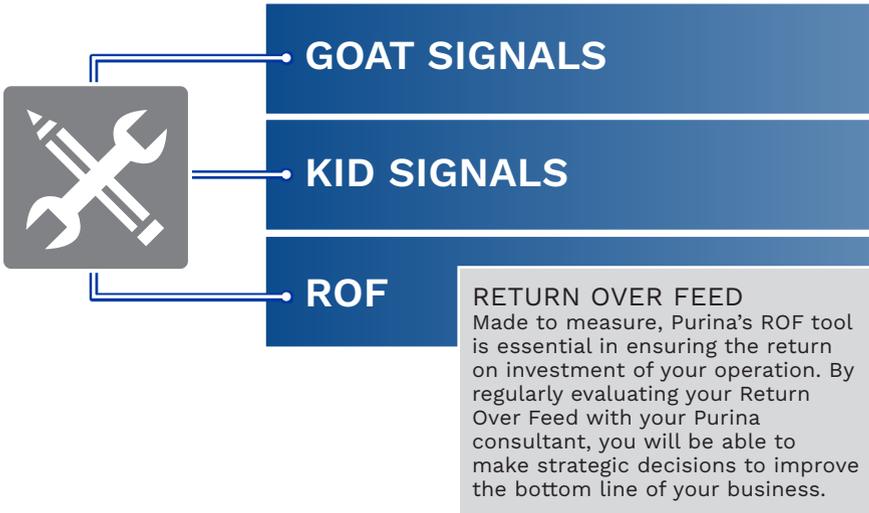

OPTILAC, Purina’s ration formulation tool paired with Purina’s **GOAT SIGNALS** management tools help you identify the bottlenecks in your operation and implement solutions to maximize profitability. Working with your Purina Dairy Consultant, the **GOAT SIGNALS SCORE** will enable you to enter the barn and immediately identify the details that promote superior goat comfort, health and production.

Kid survivability is key to the success of the milking herd. Purina’s **KID SIGNALS SCORE** will help you evaluate the environmental impacts and nutritional challenges (specifically related to colostrum quality) which may be wreaking havoc in your replacement animals.

Purina’s goal is to help you improve the performance, efficiency and profitability of your herd.

TOOLS

STARTER AND GROWER FEEDS

Designed to provide an excellent source of nutrition to support growth and to optimize rumen development. Purina is committed to improving the health of your herd through nutrition and by providing the tools needed to improve colostrum quality giving your kid goats the best start.

1159 CAPRINA MILK REPLACER 20:18

Protein
20%

Fat
18%

CAPRINA MILK REPLACER is made of high quality ingredients including all-milk proteins. It provides all the essential nutrients needed for the healthy start vital to your operation's success. Given after an adequate intake of high quality colostrum, CAPRINA MILK REPLACER is a key to your success.

1159HF CAPRINA MILK REPLACER 22:23 HF

Protein
22%

Fat
23%

CAPRINA MILK REPLACER HF is made of high quality ingredients and all-milk proteins. With higher levels of protein and fat, it contains olfactory agents and digestive catalysts to improve nutrient intake and digestion for enhanced health and growth. HF stands for high levels of fat and improved flow making this product ideal for automatic feeders.

1500 CAPRINA STARTER 18

Protein
18%

CAPRINA STARTER is a feed specially formulated for 0 to 2 month old kids made with quality ingredients chosen for their palatability in order to promote early intakes.

15055 CAPRINA STARTER 20 MC

Protein
20%

CAPRINA STARTER MC contains 20% protein and is offered in a Mash Cube format to encourage high intakes. The Mash Cube texture also provides increased digestible energy to improve kid health and growth.

1506 CAPRINA GROWER 16

Protein
16%

CAPRINA GROWER is a feed specially formulated for young female goats aged 2 to 11 months. Designed to be highly palatable, its ingredients promote rumen fermentation and papillae development which result in optimal kid development.

LACTATION

Feeds formulated to meet the specific requirements of high producing Canadian dairy goats. By optimizing your herds daily nutrient intake, you will be able to maximize milk output and components.

1510 CAPRINA 17

Protein
17%

CAPRINA 17 is a feed specially formulated for lactating goats. This economical feed promotes optimal lactation in conjunction with high-quality forage.

1513 CAPRINA HIGH FIBRE 18

Protein
18%

CAPRINA HIGH FIBRE is formulated to provide high levels of NDF and dNDF to lactating goats. This high fibre feed is ideal for feeding programs with limited, less palatable or low quality forage. These feeds are recommended when concentrates make up 70% of the total ration.

1517 CAPRINA HIGH PERFORMANCE 18

Protein
18%

CAPRINA HIGH PERFORMANCE is a complete feed formulated to maximize milk production and components for high producing goats. With high levels of energy from starch and fat, this unique formula promotes microbial population and milk protein synthesis. CAPRINA HIGH PERFORMANCE provides the perfect balance of energy and protein, for lactation.

COMPLEMENTARY FEEDS

Products formulated to complement various feeding scenarios and protein needs. Success of the transition period will lead to a successful lactation.

TRANSITION

1520 CAPRINA PREP 17

Protein
17%

CAPRINA PREP is specially formulated to promote health and performance in dairy goats during the transition period and to provide kids with a healthy start. With its high metabolizable protein content, this complete feed will ensure the production of high quality colostrum. Formulated to prevent negative energy balance in late gestation and early lactation, CAPRINA PREP contains glycerol which also encourages dry matter intakes.

MINERAL

1924 MINERAL 18:9

Mineral 18:9 is specially formulated for lactating ruminants. It is highly fortified in trace minerals and vitamins to improve immunity and metabolism during demanding breeding stages.

SAFETY AND INTEGRITY

Our work goes beyond animal nutrition and feed ingredients. It also encompasses feed safety, quality assurance of ingredients, product integrity, and the production of safe, reliable feed through standardized processes. We are committed to excellence at every step of the feed manufacturing process.

Purina has a long history of industry leadership in quality.

Purina and its dealers are working together with producers in the growing dairy market.

Talk to your Purina consultant about your business goals... our goal is to provide solutions for your success!
